

INFOPACK

Modern technology = a better life

YOUTH EXCHANGE

OVERVIEW

GOAL

The main goal of the project is to create a strategy that will promote the use of artificial intelligence (AI) and modern technologies. The project aims to raise public awareness of the growing potential of AI and new technologies. The project will help participants improve their digital skills, learn more about artificial intelligence, explore AI applications, and discover the cultures, traditions, and customs of other countries. Through this initiative, young people will become more aware of their roles as European and global citizens, helping bring about positive social changes by showing how modern technologies can improve living conditions. Participants will conduct a workshop in local school, prepare multimedia materials on commonly used AI technologies, manage a Facebook profile, and create a multimedia presentation to summarize the project's activities.

OBJECTIVES

- Develop Digital Skills: Empower youth with the skills needed to understand and engage with artificial intelligence.
- AI Knowledge Enhancement: Deepen participants' knowledge of AI and its applications across various fields.
- Strengthening Participants' Social, Interpersonal, language and cultural Skills.
- Creative Development: Stimulate creativity, problem-solving, and proactive attitudes among participants.

SCHEDULE

DATES OF THE YOUTH EXCHANGE:

21.05.2025 - 29.05.2025
